TECHNICAL SKILLS

- **Languages:** TypeScript, Java
- **Frameworks & Libraries:** Next.js, React, Spring Boot, Tailwind CSS
- **Tools & Environments:** Linux (Ubuntu/Custom Environments), Git, RESTful APIs

PROJECTS & EXPERIENCE

Smart-Chama Project | *Founder & Full Stack Developer* | Nov 2025 – Present

- Architected and developed a full-stack fintech web application designed to digitize local Table Banking and Merry-Go-Round groups.
- Engineered the backend using Java Spring Boot to handle complex interest calculation engines for loan distributions.
- Integrated the M-Pesa Daraja API to facilitate automated, real-time financial transactions.
- Built a highly responsive, modern frontend dashboard utilizing Next.js, React, and Tailwind CSS.

[Tech Company Name / NDA] | *Software Developer (Shadow Role)* | June 2025 – Nov 2025

- Completed a 5-month intensive shadow developer program working alongside senior engineers on production-level code.
- Utilized enterprise Git workflows for version control and collaborative development.
- Contributed to backend optimization tasks and architectural planning.
- *[Add one more bullet point here about a specific bug you fixed or feature you helped with]*

Course Corner & KUCCPS Pro-Analyzer | *Full Stack Developer*

- Developed web utility projects aimed at assisting students with university admissions.
- Engineered a Spring Boot service for Course Corner to efficiently calculate and process university cluster point requirements.
- Designed custom UI components and branding elements, including specific OpenGraph configurations for seamless social sharing.

EDUCATION

Technical University of Mombasa | Mombasa, Kenya *Bachelor of Technology in IT* | Expected Graduation: [2028]
